

REMARKS

The specification has been amended to provide sequence identifiers for Figures 11-16. A substitute Sequence Listing was also necessary to correct presentation of nucleotide sequences that were not presented in the 5 to 3 direction. Applicant's amendments do not introduce new matter.

Applicants submit this Amendment to provide, as a separate part of the disclosure, a substitute "Sequence Listing" pursuant to 37 C.F.R. §§ 1.821-1.825. In addition, Applicants submit the substitute Sequence Listing in paper copy and on floppy disk in computer-readable form.
